

Butcher Creek/3 Mile Creek Watershed TMDL Implementation 2005-2009

The goal of the Ag Plan is to contribute toward full support of identified beneficial uses through enhancement and maintenance of the quality of surface and ground waters of Idaho, to the extent that they are impacted by agricultural non-point source pollutants.

Best Management Practices

- . Continuous Direct Seed**
- . Sediment Basins**
- . Grass Filter Strips**
- . Fencing**
- . Livestock Crossings**
- . Water Developments/Troughs**
